8 Channel Penta-brid 4K Compact 1U XVR

The Device features powerful digital monitoring capability for the security industry. The embedded LINUX OS assures the stable operation, high accessibility and delivers unmatched monitoring with easy to use configurations. The Device features functions such as recording, playback, and monitoring and offers synchronization for audio and video. The Device also adopts the advanced control technology and has a strong network data transmission capability.

Series Overview

The Device harnesses its embedded design to ensure high security and reliability. It can work from the local end or, through its strong networking capability, connect to the professional surveillance software to form a security network, displaying its powerful remote monitoring functions. Also, it can upgrade the old system for fine definition without changing the initial circuit.

Functions

GUI4.0
Brand new local and web UI style.

Zero-channel Encoding
Uses zero-channel encoding to blend multiple analog and IP channels into one channel. Enjoy monitoring through remote multi-window live view and save on networking transmission bandwidth.

Recording
Features several types of playback, including simultaneous, event, tag, smart, image, fast and slow playback.

HDCVI/AHD/TVI/CVBS Auto-detect
HDCVI/AHD/TVI/CVBS Auto-detect
The XVR can auto recognize the signal of front-camera without any setting. It makes operation more friendly and convenient.

Coaxial Audio/Upgrade/Alarm

- H.264/H264+dual-stream video compression

- Supports HDCVI/AHD/TVI/CVBS/IP video inputs

- Max. 12 channels IP camera inputs, each channel up to 8 MP

- Max. 48 Mbps incoming bandwidth

- Supports 5 MP camera input

- Supports simultaneous display of VGA and HDMI

- Supports 1 SATA HDD, up to 8 TB

- Smart Search and Intelligent Video System

The integrated design can reduce wiring troubles which makes it much more cost-effective and convenient for installation.

Long Distance Transmission
The HDCVI system supports long distance transmission over coaxial cable and UTP, max. 300 m for 1080p and 500 m for 720p.

Intelligent Video System (IVS)
With built-in intelligent video analytics, the XVR has the ability to detect and analyze moving objects for improved video surveillance. The XVR provides optional standard intelligence at the edge allowing detection of multiple object behaviors such as abandoned or missing objects. IVS also supports Tripwire analytics, allowing the camera to detect when a pre-determined line has been crossed.

Face Detection
It is a typical technology being used in a variety of applications for searching or identification of individuals.

Spot Output
It is made for a secondary monitor. This allows the operator to view one special monitor that assigned to selected cameras or video inputs from higher security areas.
