

EZLive Mobile Surveillance App

Overview

EZLive is a mobile surveillance app intended for small businesses. You can use this app to connect to Uniview devices through network and view live or recorded video, control PTZ cameras, receive alarm notifications, share devices, manage files and have two-way audio on a mobile phone. This app is ideal for scenarios such as kindergartens, restaurants, stores, etc.

Features

- Add devices: Supports quick adding by QR code scanning and allows adding devices without signup for a cloud account.
- Allows multiple users to view the same video contents simultaneously through device sharing or by logging in to the same account from multiple clients.
- Rich features:

Live view: Multi-window display, PTZ control, two-way audio, multiple options of image quality, snapshot, local recording, and corridor mode.

Playback: Recording search, synchronous playback, smart playback, split search, playback of recordings saved on an SD card.

Alarm: User can receive real-time alarms and view alarm-related recordings.

Remote configuration: User can configure devices on their mobile phone, including time, illumination, motion detection, human body

detection, automatic tracking, alarm sound, and recording schedule.

Device management: User can share devices, cancel sharing, and transfer devices.

Cloud account management: Allows user to sign up using mobile phone number/email, edit account information, retrieve password, cancel accounts.

File management: Allows user to sort files by type (image/video), export to album, share through third-party applications.

Device maintenance: User can upgrade device by cloud, export diagnostic information, test network speed.

Specifications

Function	Description
Device Management	
Device management	Max. 6 devices or 100 channels.
	Supports IPC, NVR, video doorbell.
	Demo devices are provided for trial.
	User can add a device by scanning QR code or inputting register code.
	User can add devices without signup for a cloud account.
	User can edit and delete devices.
	User can share and transfer devices.
	User can upgrade devices/channels by cloud, export diagnostic information, and test network speed.
Live View	
Play control	1/4/6/9/12/16 image display.
	Multi-screen display.
	Multiple image quality options: HD/SD/Smooth (main/sub/third stream).
	Corridor mode.
	Digital zoom.
	Play/pause video in the selected window.
	One tap to start playback in the selected window.
	Snapshots and videos can be saved to the mobile phone and can be viewed by one tap of the button.
